

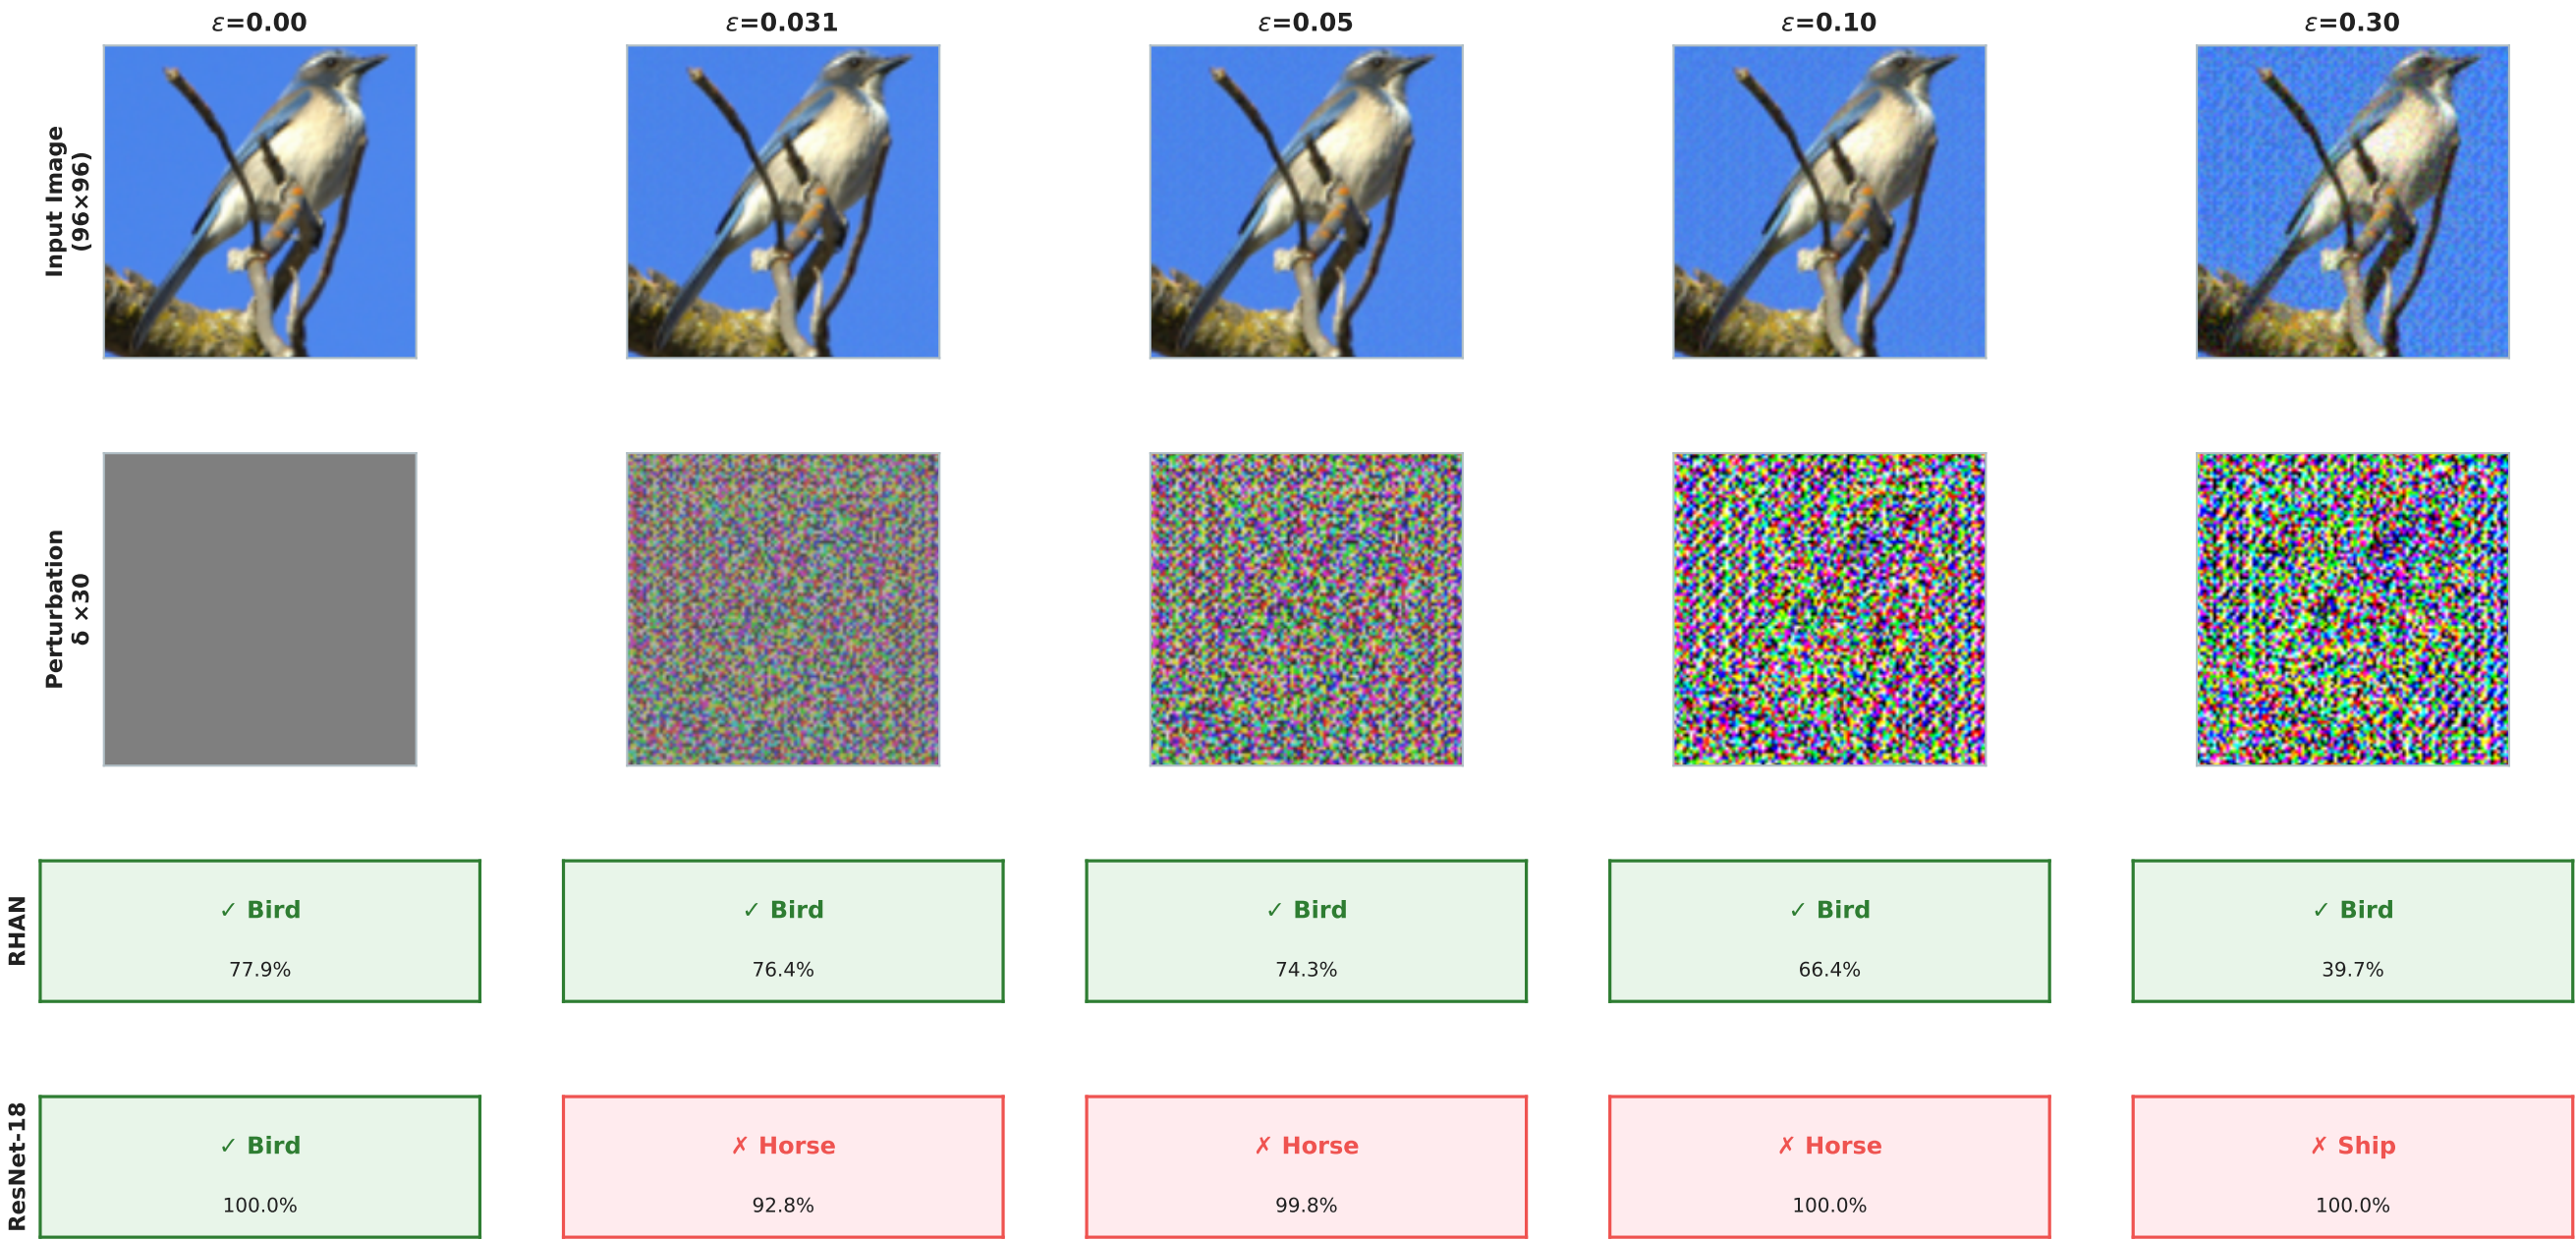

Figure K3 — Progressive Visual Robustness Under Increasing Adversarial Perturbation
STL-10 index 5636 · Class: Bird · Attack: PGD-20 grey-box (RHAN) / white-box (ResNet-18) · RHAN survived $\epsilon = 0.30$

Summary		
ϵ	RHAN	ResNet-18
0.00	✓	✓
0.031	✓	✗
0.05	✓	✗
0.10	✓	✗
0.30	✓	✗

Representative STL-10 example illustrating a case in which RHAN maintains correct semantic recognition under progressively stronger adversarial perturbations while a conventional CNN fails substantially earlier. This visualization is intended as a qualitative illustration; quantitative robustness is reported separately.
